

Research Center for Marine Biology

Tohoku University

9 Sakamoto, Asamushi, Aomori, Aomori 039-3501, JAPAN

December 7, 2018

Dear partner universities,

The Research Center for Marine Biology, Tohoku University will hold the Shinkishi Hatai International Marine Biology Course 2019 from July 18th to 24th, 2019 at our institute in Aomori, Japan. This program is supported by Japan's Ministry of Education, Culture, Sports, Science and Technology.

We would be grateful if you could inform related institutes and students (both graduate and undergraduate students) who may have interest in our course using the two attachments (a document on the course details and a poster).

The course is open to undergraduate and graduate students who are majoring in biology, life science and related fields, with particular focus on developmental biology and meiobenthology, and its purpose is to provide them with experiences with basic experiments and practices. Some of the participants will be Japanese students; therefore, it will be a good opportunity for the students to deepen their exchanges with each other. Experience with handling marine invertebrates is not necessary.

Information about the teaching staff and the details of the course are available from our website.

For further information (course details, application forms, details of accommodation, and so on), please contact us through our website and e-mail (shimbc2019@grp.tohoku.ac.jp).

I thank you for your cooperation.

Sincerely yours,

Takuya Minokawa

Organizer of the Shinkishi Hatai International Marine Biology Course 2019,
