How can we achieve this? One of the answers could be in Human Rights, which provide us with the norm of conduct for all human beings equally. Education has an important role in making this possible, because it gives us basic knowledge about Human Rights and opportunities for us to analyze the individual cases deeply and express our views in the classroom. We are going to learn the Universal Declaration of Human Rights as basic knowledge. Then, we will expand our discussion regarding the human rights issues from personal perspectives, and think about practical solutions based on the Human Rights documents.  1) Introduction: What do we mean by "human rights", i.e., who is "human" and what are their "rights"?  2) Discuss: How can we achieve "Justice and Peace"? Some people may think that justice and peace are just an ideal, and it is not possible to achieve. Is it really true? Let's discuss and find out!  3) Discuss: Is Human rights Education just an ideal? If we think human rights and human rights education are just abstract concepts, human rights cannot be achieved. What should we do to put this in practice?  4) Discuss: What are the most important of the UDHR's principles? You can think about which right is the most important for you. You will find some similarities and differences between you and your classmates.  5) Discuss: Is human rights effective? If we did not have the concept of human rights? In order to answer this, we need to know the history and the development of women's status and the rights.
