授業題目	Latin American Politics
授業の目的と概要	<p>This course is designed to introduce students to the political history and current dynamics unfolding in Latin American and Caribbean countries to understand the diverse elements that shape and influence the political systems of these states and their development models.</p> <p>The focus throughout the course will be providing students with the necessary content to understand developments in contemporary Latin American politics through the study of the different political approaches implemented by the governments of the region to promote national and regional development and challenge or insert themselves into the Global Governance architecture.</p>
学習の到達目標	<ol style="list-style-type: none"> 1. To study, understand, and compare the different approaches of Latin American and Caribbean nations in relation to domestic and foreign policy. 2. To develop a critical appreciation of recent trends in Latin America and the Caribbean, as well as their historical roots. 3. To analyze specific case studies for a significant comprehension of the object of study. 4. To strengthen academic presentation skills through the elaboration of individual and group presentations. <p>Students should come away from the course with an understanding of the diversity of political and economic systems in the Latin American and Caribbean region, an awareness of the pressing political and economic challenges of these countries to achieve sustainable development, and an appreciation of the questions and concepts that shape the work of professionals in politics and international relations.</p>
