

ドイツで広げる研究国際ネットワーク

Enhance your international network in Germany

Science and research are driven by **curiosity** and encounters with the new and unknown. The exchange of ideas and arguments is essential to generate **new knowledge** and **innovation**. This means a career in science and research can lead you to foreign countries and **new frontiers**, can get you in contact with other cultures, and can **keep you always inspired**.

If you want to be part of a **global research community** and work with colleagues from all over the world on new solutions for humanity on local, regional and global level, you should try to enhance your **international network in Germany**.

INFORMATION DAY at Tohoku University with...

- ▶ **advice from experts** for research funding about **fellowships and scholarships in Germany and Europe** in a presentation session,
- ▶ **advice and support fitted to your own career plans** at individual advice sessions,
- ▶ and **first hand information** on flexible career and funding opportunities.
